JOINING AN ARTS SOUTH DAKOTA ZOOM WEBINAR

For the best experience on any device, it is recommended you download the Zoom client from zoom.us, or your phone or tablet's app store, and set up a quick, free account. See below for device specific instructions.

iOS or Android Phone or Tablet

Please download the free Zoom client from your app store. When you click on the link to the webinar from the [webinars page](#), it should automatically open your zoom client.

Windows or Apple Computer with Zoom app

Please download the free Zoom client from zoom.us, or from the link when trying to join the webinar. When you click on the link to the webinar from the [webinars page](#), it should automatically open your zoom client.

Web Browser (no app installation necessary)

You can use a limited version of Zoom from within a browser on a desktop or laptop computer without the need to install additional software. It works across all major browsers, but is most functional in Google Chrome. After you click on the link to the webinar from the [webinars page](#), wait until the link "start from your browser" shows, as per the screenshot below. Click this link to be taken to the web version of the zoom client.
